**EUROPEAN TIMBER REGULATION**

L. van Heek Textiles BV confirms commitment to avoid the use of wood based materials derived from illegally harvested timber as outlined in the European Regulation No 995/2010 of the European Union and of the Council of October 20, 2010, which is in force since March 3 2013.

We are FSC® certified since April 28th, 2015 (NC-COC-022077).

We only use fully recycled press wood pallets which comply to the above regulation because of their positive effect on forest conservation. Our supplier of pallets is PEFC certified.

Our paper based packaging supplier recognises its responsibility on sustainability in terms of the sourcing of wood and fibre from third parties, or timber harvested from its owned forest lands for the purposes of converting it into appropriate value added products in its core business of paper based packaging. Our supplier is FSC certified and commits to the EU timber regulation (No. 995/2010, from 20 October 2010).

Kind regards,

L. van Heek Textiles bv
